

Gautam Bhat

89 Chester St Apt C4, Allston MA 02134 | (857)272-4311 | gautam@bu.edu | gautambhat.github.io

Objective

To secure a full-time job where I can apply my knowledge of computer science to solve challenging, real-world problems.

Education

MASTER OF SCIENCE | MAY 2017 | BOSTON UNIVERSITY, GRADUATE SCHOOL OF ARTS AND SCIENCES | BOSTON, MA

Major: Computer Science, GPA: 3.75/4.0

Relevant Courses: *Advanced Algorithms, Databases, Machine Learning, Computer Networks, Image and Video Computing, Software Engineering*

BACHELOR OF TECHNOLOGY | JUNE 2015 | SHIV NADAR UNIVERSITY, SCHOOL OF ENGINEERING | INDIA

Major: Computer Science and Engineering, GPA: 7.44/10

Undergraduate Thesis: *Detecting and Analyzing Communities in Social Network Graphs for Targeted Marketing* (Graph Theory and Social Network Analysis)

Skills & Abilities

- Proficient in: Java, PHP, Javascript, HTML, CSS, MySQL, jQuery, Git, Algorithms, Data Structures, Agile
- Familiar with: C, C++, Python, OpenCV, MATLAB, Scikit-learn, ReactJS, Meteor.js, MongoDB, Laravel, PostgreSQL, Android

Experience

TEACHING ASSISTANT | DEPARTMENT OF COMPUTER SCIENCE, BOSTON UNIVERSITY | MAY 2016 - PRESENT

- Worked as teaching assistant and grader for three courses, including Machine Learning.
- Instructed two lab sections over the summer, and three in the fall, by preparing lab material and code, leading discussions, and holding office hours to help students understand concepts outside of class.

SOFTWARE DEVELOPER (INTERN) | COLOREDCOW CONSULTING, GURGAON, INDIA | MAY 2014 – OCTOBER 2014

- Worked in the back-end development of an online social portal for chefs looking to host parties and events, using Laravel (a framework for PHP).

SUMMER INTERN | NCR CORPORATION, GURGAON, INDIA | MAY 2013 – JULY 2013

- Created a skills repository web application and integrated it with LinkedIn APIs.
- Application served as an 'Expert Locator' for employees in the corporation.

Relevant Projects

- **Meetcute – A Modern Dating App:** Working in an agile team to develop a web and mobile-based dating app with neural network-based profile matching and recommendations. (MeteorJS, ReactJS)
- **Face Expression Analysis during Student Learning:** Using Affectiva to visually monitor students and improve learning software via data analysis.
- **Object Recognition and Tracking:** Utilized techniques in computer vision such as segmentation, thresholding, and template matching to identify and track objects in various scenes, as well as recognize hand gestures. (OpenCV)
- **NN-based Poker Bot:** Implemented a single-hidden layer feedforward neural network for poker hand classification, achieving 94.8% accuracy, and used it to devise a playing strategy against human opponents. (MATLAB)
- **Web-based Photo Social Sharing App:** Designed, implemented and documented a database system for a web-based photo social sharing application, as a part of a course project. (PHP, Javascript, MariaDB)
- **Fantasy Football:** Created an interactive fantasy soccer web application for the intra-university soccer league, with 20% of all students registering with the app within 24 hours. (PHP, Javascript, jQuery, MySQL)
- **Conference Room Booking System:** Developed a conference room booking web application for the university administration. (PHP, Javascript, jQuery, MySQL)
- **Music Management Utility:** Made a music management utility for bash shell, to search music, create playlists, and play songs via VLC extension, as a part of a course project. (shell script)
